Student message:

Document : consumer perception towards Junk Food. Jamal College.doc [D61997444]

About 39% of this document consists of text similar to text found in 133 sources. The largest marking is 92 words long and is 73% similar to its primary source.

PLEASE NOTE that the above figures do not automatically mean that there is plagiarism in the document. There may be good reasons as to why parts of a text also appear in other sources. For a reasonable suspicion of academic dishonesty to present itself, the analysis, possibly found sources and the original document need to be examined closely.

Document : Fuzzy sets in KM-algebra.pdf [D76313510]

About 100% of this document consists of text similar to text found in 61 sources. The largest marking is 2,487 words long and is 100% similar to its primary source.

PLEASE NOTE that the above figures do not automatically mean that there is plagiarism in the document. There may be good reasons as to why parts of a text also appear in other sources. For a reasonable suspicion of academic dishonesty to present itself, the analysis, possibly found sources and the original document need to be examined closely.

About 11% of this document consists of text similar to text found in 144 sources. The largest marking is 84 words long and is 99% similar to its primary source.

PLEASE NOTE that the above figures do not automatically mean that there is plagiarism in the document. There may be good reasons as to why parts of a text also appear in other sources. For a reasonable suspicion of academic dishonesty to present itself, the analysis, possibly found sources and the original document need to be examined closely.

Document : Secure Virtual Machine Migration using Ant Colony Algorithm (THESIS).docx [D77842738]

About 27% of this document consists of text similar to text found in 60 sources. The largest marking is 113 words long and is 71% similar to its primary source.

PLEASE NOTE that the above figures do not automatically mean that there is plagiarism in the document. There may be good reasons as to why parts of a text also appear in other sources. For a reasonable suspicion of academic dishonesty to present itself, the analysis, possibly found sources and the original document need to be examined closely.

Document : Springer Paper Template3 (1).docx [D54159441]

IMPORTANT! The analysis contains 1 warning(s).

About 8% of this document consists of text similar to text found in 69 sources. The largest marking is 52 words long and is 85% similar to its primary source.

PLEASE NOTE that the above figures do not automatically mean that there is plagiarism in the document. There may be good reasons as to why parts of a text also appear in other sources. For a reasonable suspicion of academic dishonesty to present itself, the analysis, possibly found sources and the original document need to be examined closely.
