Key Indicator - 4.3 IT Infrastructure

4.3.1 Institution frequently updates its IT facilities and provides sufficient bandwidth for internet connection

Video Conferencing

A video conferencing system like cameras, microphones, and displays, along with software for seamless virtual meetings in a college facilitates remote communication and collaboration among students and faculty. This system enables live lectures, group discussions, and presentations across locations, fostering inclusivity and flexibility in education. Students can attend classes remotely, participate in discussions, and access course materials, enhancing the overall learning experience and accessibility of education.
