

Key Indicator - 4.4 Maintenance of Campus Infrastructure

4.4.2 There are established systems and procedures for maintaining and utilizing physical and academic support facilities – classrooms, laboratory, library, sports complex, computers, classrooms etc.

Infrastructure Maintenance Register

An infrastructure maintenance register is a detailed record-keeping system that tracks all maintenance activities related to campus infrastructure. It includes information such as the date, time, location, type of infrastructure, maintenance tasks performed and the individuals or teams responsible for the maintenance work. This register helps to monitor the condition and functionality of campus facilities. It ensures that maintenance interventions are timely. The register also aids in budget planning for infrastructure upkeep. It supports compliance with regulatory standards and safety protocols.
