- ❖ There will be a future research programme on Endometriosis initiated by Dr.Ramani Devi M/O Dr.C.Anjana Devi.

Inputs given by Mrs. Deepa Rajkamal

By categorizing the pass out students of a class as women at career path and women as House wife, i feel there are more number of women choosing the career and due to various situation they might break the career or left the job. Those women required lots of emotional and current updates to catch up job again and to be empowered.

As per recent reports, the life expectancy will be high but the healthy life will be challenging and mental health issues will be predominant. So women requires their self support system and financial empowerment is vital.

Life expectancy of women career is very low comparatively because they are in need to support the family. We can think of, to create a pool of support system for the women studied in Cauvery college as follows

Type 1. Women not have started the career after the degree but required support to start her career after settling their sons and daughters.

Type 2. Women got the job after the degree and left the job after marriage.

Type 3. Women dropped their career in between to support their children's education

we can start a counselling centre - "RESTART CAREER"

Successful Alumina can support to provide motivation and technical support based on their required. We can search for good resource agency to support us to create the platform and also app can be developed to register.

Out college students are spread across various parts of Tamil Nadu.
