Entrepreneur Development Cell

The Entrepreneur Development Cell (EDC) in a college is dedicated to cultivating entrepreneurship among students. It provides training, workshops, and mentorship to help students develop business ideas and startup skills. The EDC facilitates access to resources such as funding opportunities, business planning tools, and networking with industry experts. By hosting pitch competitions and innovation challenges, the cell encourages practical experience and creative thinking. Its goal is to inspire and support students in transforming their entrepreneurial aspirations into viable business ventures, thus bridging the gap between academic knowledge and real-world application.
