INTRODUCTION

College students face a myriad of academic challenges, from managing assignments, seminar, quiz to preparing for exams. At the heart of academic success lies the cultivation of

effective study habits, which serve as the foundation for learning, retention, and critical

thinking.

Components of Effective Study Habits:

Time Management: Effective study habits hinge on the ability to manage time efficiently.

College students must allocate sufficient time for studying, attending classes, completing

assignments, and engaging in extracurricular activities. Establishing a structured schedule and

prioritizing tasks can help students optimize their time and minimize procrastination.

Active Engagement: Passive learning methods, such as re-reading notes or textbooks, yield

limited results compared to active learning strategies. Students should engage actively with

course material through practices like summarizing key concepts, creating flashcards, and

participating in discussions. Active engagement enhances comprehension, retention, and

critical thinking skills.

Organization: Organizational skills play a vital role in effective studying. Students should

maintain well-organized notes, materials, and study spaces to minimize distractions and

facilitate efficient studying. Utilizing digital tools, such as calendars, task managers, and

note-taking apps, can aid in organizing study materials and deadlines.

Self-Regulation: Successful students exhibit self-regulatory behaviors, such as setting goals,

monitoring progress, and adjusting study strategies accordingly. They should cultivate self-

awareness and reflection to identify strengths, weaknesses, and areas for improvement.

Implementing strategies like self-testing and spaced repetition can enhance long-term

retention and learning outcomes.

Common Pitfalls in Study Habits:

Procrastination: Procrastination is a common challenge among college students, often

fueled by distractions, perfectionism, and lack of motivation. Delaying study sessions until

the last minute can lead to increased stress, subpar performance, and compromised learning

NAAC Accreditation III Cycle: A Grade (CGPA 3.41 out of 4) Tiruchirappalli - 620018, Tamil Nadu, India

NAAC - Cycle IV SSR

CRITERION II

OUTCOME ACHIEVED

outcomes. Overcoming procrastination requires self-discipline, time management skills, and

proactive planning.

Passive Learning: Relying solely on passive learning methods, such as rote memorization or

passive reading, can hinder students' ability to grasp complex concepts and apply knowledge

effectively. Active engagement with course material, through practices like problem-solving

and concept mapping, fosters deeper understanding and critical thinking skills.

Ineffective Note-Taking: Poor note-taking habits, such as copying verbatim from lectures or

failing to organize notes coherently, can impede students' ability to review and retain

information. Students should adopt effective note-taking strategies, such as summarizing key

points, using abbreviations, and incorporating visual aids, to enhance comprehension and

recall.

Practical Strategies for Improvement:

Set Clear Goals: Establishing specific, measurable goals can provide direction and

motivation for studying. Students should identify academic objectives, break them down into

manageable tasks, and track progress regularly to stay focused and accountable.

Create a Productive Study Environment: Designate a dedicated study space that is free

from distractions and conducive to concentration. Minimize interruptions, such as noise or

electronic devices, and ensure access to essential study materials and resources.

Employ Active Learning Techniques: Experiment with a variety of active learning

techniques, such as practice quizzes, group discussions, and problem-solving exercises, to

deepen understanding and reinforce key concepts.

Practice Self-Care: Prioritize self-care practices, such as adequate sleep, regular exercise,

and healthy nutrition, to optimize cognitive function and well-being. Taking breaks,

practicing mindfulness, and seeking support from peers or academic advisors can also

alleviate stress and enhance productivity.

The outbreak of COVID-19 in early 2020 marked a pivotal moment in modern history,

causing widespread disruption across various sectors, with education being significantly

affected. College students already passing a crucial phase of their academic journey, found

themselves grappling with unprecedented challenges as traditional learning environments

underwent drastic transformations. There was a shift to remote learning made the students depend upon electronic gadgets and they have mastered operating different applications in their mobiles and become addicted to electronic gadgets. It is the need of the hour to study the study habit of mentees and the counseling centre made a survey among the mentees.

ANALYSIS AND INTERPRETATION

More than half of the mentees (51.2 percent) from arts stream and nearly half of the mentees (48.8 percent) took part in the survey on study habits of mentees.

A vast majority (83 percent) of the studnets belonged to undergraduataion while nearly one fifth (16.6 percent) were post graduate mentees.

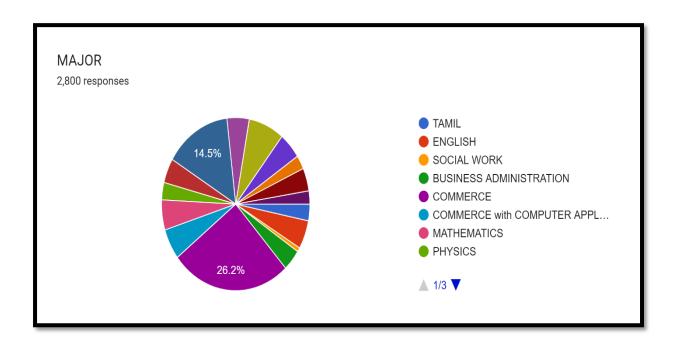

NAAC Accreditation III Cycle: A Grade (CGPA 3.41 out of 4) Tiruchirappalli - 620018, Tamil Nadu, India

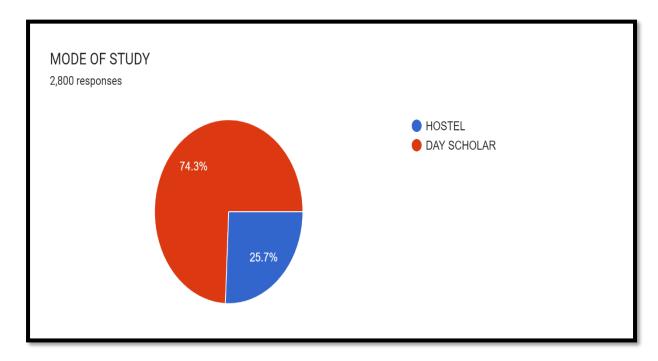

NAAC - Cycle IV SSR

CRITERION II

OUTCOME ACHIEVED

Nearly one third of the mentees (26.2 percent) were from commerce discipline while less than one fifth of them (14.5 percent) were from Tamil and meagre proportion of the mentees were from other disciplines.

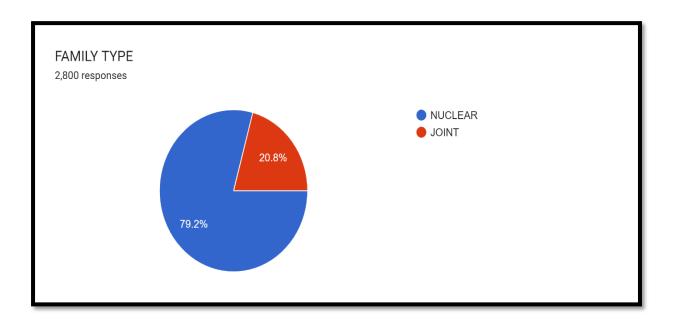

Majority of the mentees(74.3 percent) were days scholars and more than one fourth of the mentees (25.7 percent) were staying in hostels.

NAAC Accreditation III Cycle: A Grade (CGPA 3.41 out of 4) Tiruchirappalli - 620018, Tamil Nadu, India

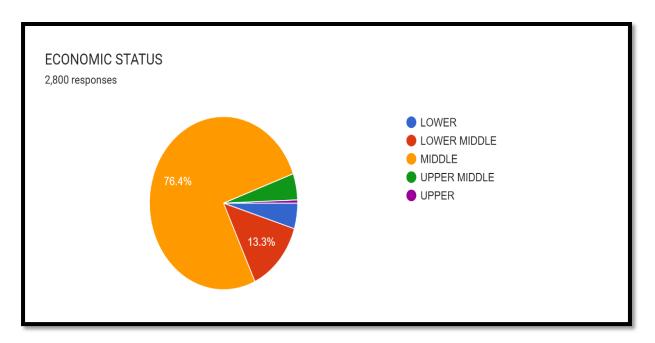

NAAC - Cycle IV SSR

CRITERION II

OUTCOME ACHIEVED

Majority of the mentees (79.2 percent) were from joint families while more than one fifth of the mentees (20.8 percent) were from nuclear families.

With regard to the economic status of the mentees, majority of the mentees (76.4 percent) were from middle class families while less than one fifth of the mentees (20.8 percent) were from lower middle class families and the remaining few mentees were from lower, upper middle and upper class families.

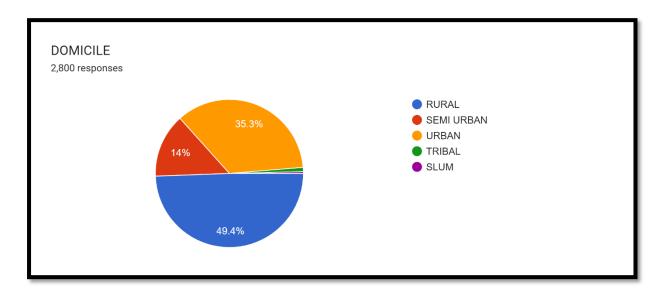

I Description

NAAC Accreditation III Cycle: A Grade (CGPA 3.41 out of 4) Tiruchirappalli - 620018, Tamil Nadu, India

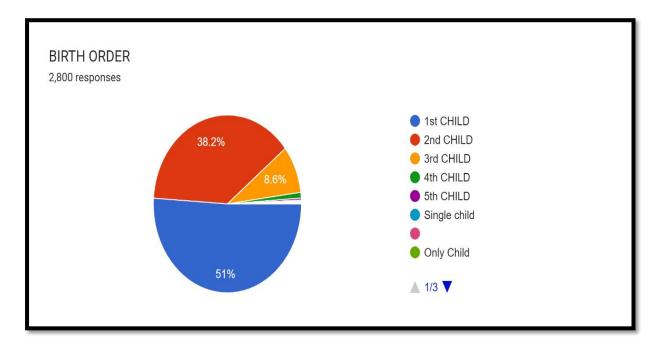

NAAC - Cycle IV SSR

CRITERION II

OUTCOME ACHIEVED

While looking into the domicile of the mentees, nearly half of the mentees (49.4 percent) were from rural areas while more than one third of the mentees (35.3 percent) were from urban areas and less than ine fifth of the mentees (14 percent) were from semi urban areas. Meagre proportion of them were from tribal and slum areas.

Birth order determines the behaviour of the mentees, the mentees in the academic year 2023-2024, more than half of the mentees (51 percent) were first born in their families while more than one third of the mentees (38.2 percent) were second child in their families and few proportion of them were third child in the their families.

OUTCOME ACHIEVED

IMPLICATIONS OF THE STUDY

A careful scrutiny of the results of the present study reveals that majority of the mentees had good study habit however a significant proportion of the mentees had faced difficulties in concentration, remembering, taking tests, time management, putting more efforts to make an attempt of difficult assignments etc. Further few had the attitude of not bothering about their grades, taking tests, listening lectures etc. This may be due to their less interest in studies, diversion due to mobile usage, playful nature, less motivation, not much ambitious, indulging in love affairs, poor economic condition, academic backwardness, disorganized and broken families, peer group influence etc.

MEASURES TO ENHANCE THE STUDY HABIT OF MENTEES

- Mentor of each class may identify the students who score lower marks in the tests and who are not showing interest in submitting assignments on time, who are always distracted during lecture hours and may speak to them personally to know the reasons for their academic backwardness
- Mentors may refer students who they consider needs professional assistance to diagnose their real problems and get treated.
- ➤ Faculty development programmes may be arranged to orient teachers to make their lectures interesting
- ➤ Parent-teachers meeting can be arranged periodically and parents may be well informed about the problems of their wards and seek their support to mend the students positively.

CONCLUSION

The present study reveals majority of the students possessed good study habit except few. All the students can be helped to come out of their problems through appropriate measures by the management, mentors, parents and peer group. Effective study habits are essential for students to thrive academically and achieve their educational goals. By prioritizing time management, active engagement, organization, and self-regulation, students can overcome common pitfalls and cultivate a sustainable approach to learning. By embracing practical strategies for improvement and fostering a culture of continuous growth, students can unlock their full potential and succeed in their academic endeavors.

ACTION TAKEN REPORT

- Mentees who had faced difficulties were referred to the Counselling Centre through HOD and Principal
- > Cases were dealt by trained counsellors of **Student Counselling Centre**
- Parent Teachers meetings were conducted and the mentees' problems were discussed
- ➤ All the departments organize Capacity Building and Skill Training programs for the students through department associations.
- > Students are taken orientation visits to make their learning more interesting
- Skill Development Courses and Value-Added Courses were started so that all the students are given freedom to select the courses of their own interest so that the unique capacity of the students brought out.
